

Amendments to the Specification:

Please replace the paragraph beginning on page 4, line 8, with the following rewritten paragraph:

In order to overcome the above-described drawbacks, the present invention provides a rubber crawler running ~~device~~ device.

Please replace the paragraph beginning on page 11, line 20, with the following rewritten paragraph:

Further, the guide skirt body ~~70-70'~~ may be disposed at a position where the guide skirt body ~~70-70'~~ contacts the rubber projections 61. However, when the guide skirt body ~~70-70'~~ is disposed as close to the protruding streak 62 as possible so that the guide skirt body ~~70-70'~~ contacts a side of the protruding streak 62, the contact is not intermittent, and direction control becomes relatively easy. This structure also has advantages in that the load applied to the rubber projections 61 is reduced and the rubber projections 61 are hardly chipped away.
